

# TenraL Metal Products Co., Ltd

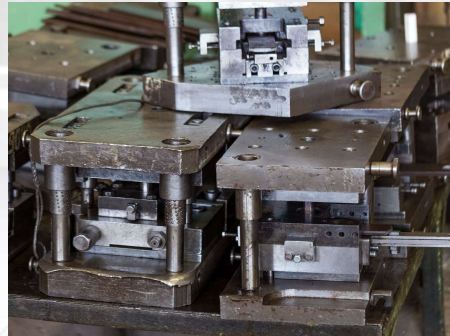

Reliable & Professional

## About us

TenraL was founded in 2005 and initially manufactured simple stamped parts. With high quality and service, our manufacturing scope is constantly expanding. 2010 was a crucial year. We began to shift our business position to the international market and purchased equity in other manufacturing companies, expanding our manufacturing scope to meet the needs of different customers.

Today, we have three production workshops equipped with more than 100 equipment, covering an area of more than 10,000 square meters, with nearly 100 employees. In addition to these, we have an in-house tool shop that specializes in manufacturing complex and precise stamping tools and molds.

Quality has always been the core value of our company. We strictly follow the tolerances of the drawings, and formulate a variety of economical manufacturing solutions. With our most advanced metal stamping equipment, unparalleled expertise and competitive prices, we are the best precision metal manufacturing company to meet your production needs.

### Metal forming services

- Mold design and manufacturing
- Stamping
- Machining
- Cutting
- Bending
- Deep drawing
- Spinning
- Welding

### Metal surface processing

- Polishing
- Deburring
- Powder Coating
- Plating
- Anodizing
- Electrophoresis
- Laser etching

Punching press		CNC machine	
8 Tons	1 set	CNC punch	2 sets
16 Tons	12 sets	CNC laser cutting	1 set
30 Tons	6 sets	CNC lathe	5 sets
40 Tons	6 sets	CNC milling machine	3 sets
50 Tons	3 sets	CNC bending machine	1 set
60 Tons	5 sets	CNC drilling machine	2 sets
80 Tons	3 sets	CNC Boring Machine	1 set
100 Tons	1 set	Auxiliary machine	
110 Tons	1 set	Robot welding	2 sets
Hydraulic press		Manual welding	15 sets
200 Tons	1 set	Manual spinning machine	4 sets
150 Tons	1 sets	Manual Shear	4 sets
75 Tons	2 sets	Manual bending machine	2 set
45 Tons	1 sets	Vibration machine	3 sets
		Rolling machine	2 sets
		Forklift	1 set
		Polisher	4 sets

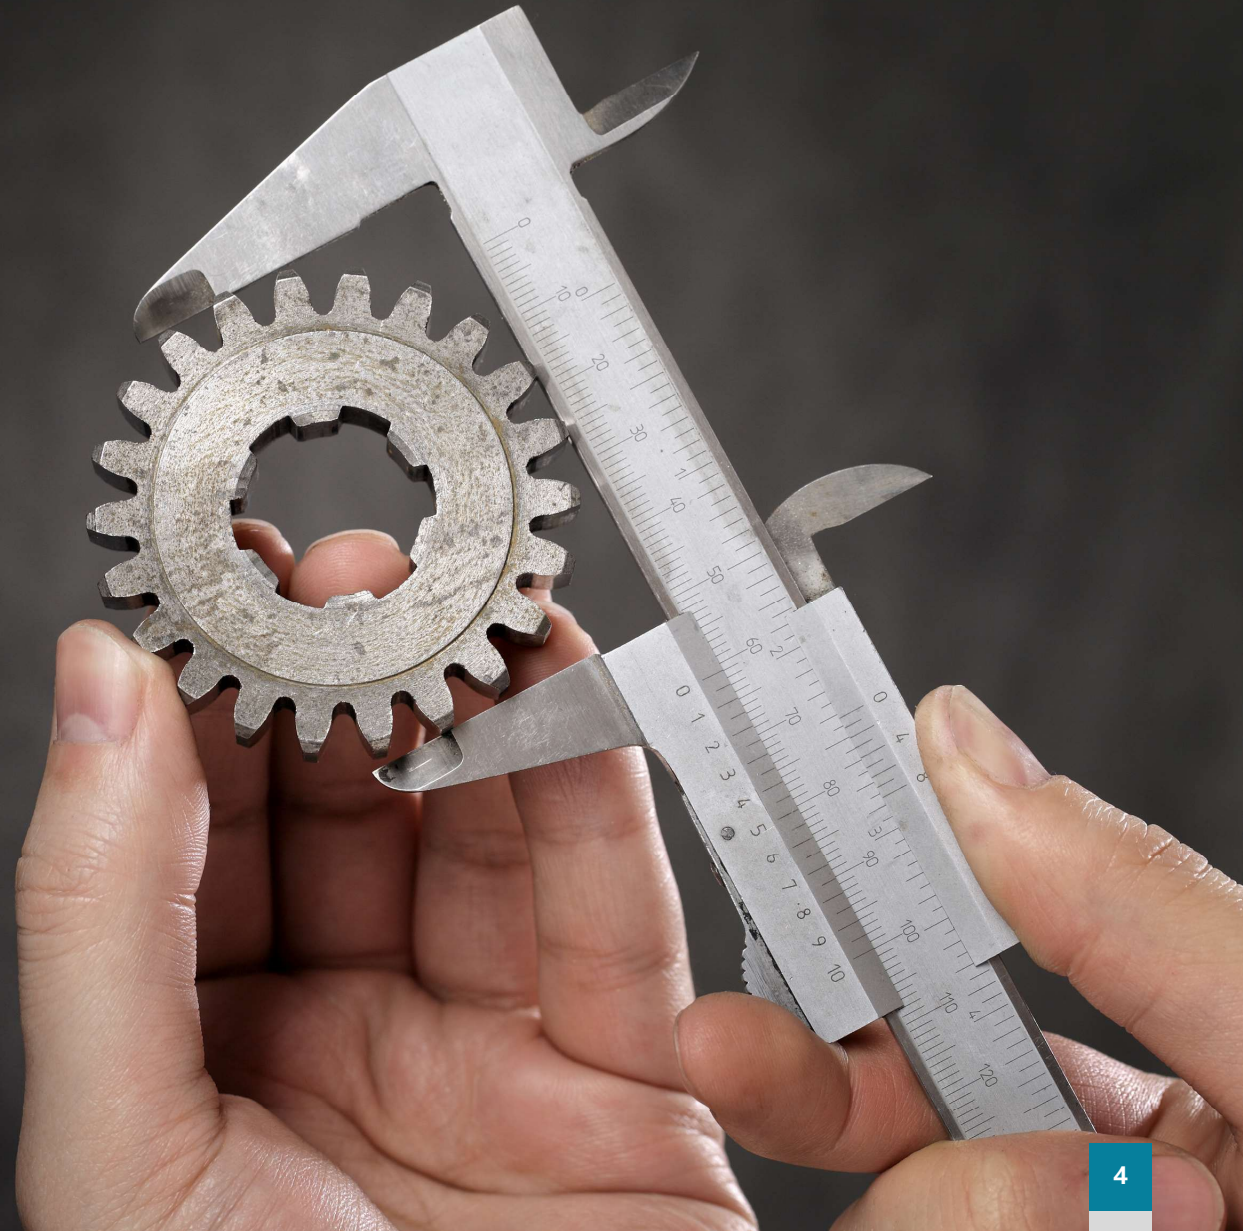

## Quality Policy

We have always respected the quality of products to the highest point of the enterprise, which is also the lifeline of the enterprise.

Product quality testing is not just an individual responsibility, but the responsibility of all employees. From the procurement of raw materials to the manufacture of finished products, all our employees are responsible for them and take every product seriously.

Our engineers work closely with the inspectors to establish the product quality file from the beginning to record the manufacturing process of each product. We always follow the ISO and IAF quality requirements and control the quality of each product.

- Raw material inspection, We insist on using internationally certified materials.
- Mold inspection, Each set of molds has been inspected by our rich engineers and quality controllers.
- Manufacturing inspection, During the manufacturing process, we have a professional team to conduct spot checks.
- Inspection before packaging, The quality control team conducts a comprehensive inspection of the finished product and measures the data for each product.

Some products cannot be displayed due to non-disclosure agreements.
